## Summary

My career work has ranged from government intranets to high volume media sites. These experiences have honed me into a skilled user interface developer who can become a valuable member of your team.

## Skills

HTML & XHTML

CSS

JavaScript

Ruby on Rails (Front End Development)

HTML5 Video

jQuery Library

Email Development

Mobile Development

PHP / Wordpress

User Interface Design

## Experience

### WebMD

Atlanta, GA

#### Senior Web Developer

July 2010 – Present

Took technical lead on a project to rebuild the site's video system. Our team replaced the Flash based video system with a JavaScript & HTML5 powered video solution which degrades to Flash for older browsers.

### Engauge Digital

Atlanta, GA

#### User Interface Developer

October 2009 – July 2010

Integrated with a marketing team to develop the front end code for Food Lion, UPS and International Delight projects. Worked on platforms such as microsites, email campaigns and ASP.NET MVC based web applications.

### Atlanta Journal - Constitution

Atlanta, GA

#### Web Developer

October 2007 – October 2009

Worked as the sole front end developer on a team of Ruby on Rails developers where I designed and developed all of the client side interfaces for classified and e-commerce applications.

### ConTech Design Group

Atlanta, GA

#### Web Developer & Security Analyst

May 2007 – October 2007

Redesigned the Atlanta Public Schools' intranet security system using HTML, CSS, VBS, ASP, and JavaScript. This replaced an outdated security system that had poor usability and security flaws.

## Education

### Southern Polytechnic State University

Marietta, GA

#### BAS in Information Technology

2012

### Central Georgia Technical College

Macon, GA

#### AAS in Computer Information Systems

2010

Specialization in Web Applications Development

Honor Graduate
